

Predator control

Scare-eye balloons

These 15" and 16" diameter "predator eye" balloons have been widely used with a great deal of success. Six reflective eyes surrounding the balloon mimicking owls and hawks. Effective against herons, cormorants, blackbirds, gulls, eagles and other types of birds. With the help of winds, the ball goes up & down and rotates by itself.

ITEM	DESCRIPTION	PRICE
SE-1	Yellow bird scare balloon, 40 cm (16").	26.95 \$
SE-2	White bird scare balloon, 38 cm (15").	26.95 \$

Quality anti-predator nets

Anti-predator nets to prevent birds from reaching your outdoor tanks and ponds. These high quality polypropylene nets with knots withstand UV radiation for more than 10 years.

These nets are very strong and virtually tear-proof. Available in different mesh sizes and colors to meet all your needs. **Available with a zipper and a rope for the contour (extra).**

ITEM	DESCRIPTION	PRICE
FPP-075	3/4" x 3/4" (1 1/2" extended), 1mm rope.	0.21 \$ / ft ²
FPP-875	7/8" x 7/8" (1 1/4" extended), 1mm rope.	0.18 \$ / ft ²
FPP-200	1" x 1" (2" extended), 1.2mm rope.	0.30 \$ / ft ²

Lockbird visual scare system

The **L300** turret from Lockbird is a visual scare device with laser that protects a specific surface up to 300,000 square feet. The L300 model with the turret is a version entirely programmable and silent specially adapted for farmers and fish farmers. The laser technology used for this product is efficient against many types of birds (starlings, herons, pigeons, blackbirds, gulls, and others).

Characteristics:

- Automatic startup and shutdown.
- Surface to be protected easily programmable.
- Requires 110V for operation or batteries in option.
- Green laser - 300Mw & 3B class.
- One-year warranty on all spare parts.
- Manufactured in Quebec, Canada.

ITEM	DESCRIPTION	PRICE
L300	Lockbird visual scare system - green laser.	6 000.00 \$

Scare kites

Our predator shaped kites keep troublemakers away from protected areas. They are also extremely efficient for scaring birds away from crop fields and public squares. Wing span is between 44 and 60 inches. Kites available in these types of predators: osprey, falcon and eagle.

The **PES110** kite includes an extension pole that can elevate up to 7 meters of height.

Extension poles **1062A** and **1062B** compatible only with the 1063 / 1064 / 1065 models.

ITEM	DESCRIPTION	PRICE
1063	Kite - Osprey, wing span of 44".	89.00 \$
1064	Kite - Peregrine falcon, wing span of 44".	89.00 \$
1065	Kite - Eagle, wing span of 60".	146.00 \$
PES110	Kite - Falcon, 7-meter pole included.	395.70 \$
1062A	Extension pole for kite, 16' (green or black).	72.00 \$
1062B	Extension pole for kite, 31' (black).	160.00 \$

Scarey Man inflatable scarecrow

The Scarey Man is a waterproof automatic inflatable scarecrow. It is equipped with a light detector (nighttime cell). It can operate in daytime, nighttime mode or 24 hours a day. The device activates automatically, the scarecrow inflates itself and a siren triggers an extremely powerful sound, frightening enough to scare off all birds found on the field.

The Scarey Man can protect up to 2 Ha (20.000 m²) against birds, depending on the topology of your land. It is possible to scare other types of animals like small and big games.

Available in multi-purpose and programmable models (hourly programming). Use a 12V battery.

ITEM	DESCRIPTION	PRICE
SCAMU	Scarey Man - multi-purpose model.	3 300.00 \$
SCAP	Scarey Man - programmable model.	3 525.00 \$

Predator control

Propane cannons

These gas cannons are very efficient for chasing away all types of animals in pretty much any situation. The mechanical models can be equipped with a timer (in option). They offer reliability and durability for years to come. Do not hesitate to communicate with us if you need any help. Can be connected to a 20-lb standard propane bottle that allows to produce up to 17,000 detonations. The shooting direction will change at every detonation when used with one of our rotative tripod stands.

In general, these cannons offer a strength of 120 decibels (equivalent to a 12-caliber) and cover a surface area of 5000 m². The electronic models are shipped with a 12-volt battery and a smart charger. **Aquamerik provides all replacement parts for our propane cannons. Please contact one of our representatives.**

• **ZN-1000 & DBS-M1** are the mechanical models operating without any battery. It is possible to add a timer (**ZN-1001**) in option to determine the operating period during the day. A special valve made for adjusting the gas flow allows to adjust the detonation frequency.

DBS-M1

• **ZN-1100 & DBS-E1** are the electronic models that require a 12V rechargeable battery. Both the operating period and detonation frequency are programmable with these electronic cannons, so no need for an additional timer. They are the most multi-skilled propane cannons you can find on the market and are entirely configurable (Multi-bang, automatic, random and on-demand modes). Available with pushbutton switch linked by cable for long-distance detonation (**ZN-1500** model).

ZN-1000

DBS-E1

• **ZN-1200, ZN-1300 & DBS-U1** are electronic models with battery and radio receiver for controlling long-distance detonation with a remote control. The transmission distance is 2500m for the **ZN-1200** model, 750m for the **ZN-1301** model and 300m for the **DBS-U1** model which is sold complete with the transmitter. For the **ZN-1200** and **ZN-1300** models, you need to add one of the transmitters from the **ZN-1201x** or **ZN-1301** series.

ZN-1100

DBS-U1

• The **ZN-1003** controller allows to adjust the detonations by intervals going from 40 seconds to 30 minutes, they are suited for the mechanical cannons.

Scare cannons

Double barrel (T4) & double effect (T5)

- Fueled by a 20 or 30-lb propane gas bottle (provided by the user).
- **T4** consumption: 10 lbs / month.
- **T5** consumption: 8 lbs / month.
- Automatically starts on morning and shuts off on evening with a timer.
- **T5** model, very effective within a 150 meters radius. Fully automatic.
- **T4** model, protects from 2 up to 40 hectares.
- Heavy-duty construction.
- Adjustable interval detonation (3 to 8 min).

TON-CREPUS

T5 provides a double effect, visual and noisy; a detonation muffles the animal and a lure is thrown along a 8-meter high pole.

Predator control

Laser torch

- Output power of 50 mWatt, 3B class, green laser.
- Non-dangerous for humans and birds.
- Giant beam to ensure the targeted birds.
- Efficiency of 1 to 2 km.

ITEM	DESCRIPTION	PRICE
TFBDL-50MW	Green colored laser torch, 50mW.	2 550.00 \$

Birdblazer laser device

This device broadcasts a large beam. Its main feature is to display the beam all across the defined area to be protected. The laser acts on the nervous system of the birds, destabilizing them and makes the place hostile to their presence. The laser transmitter has a remote control for the launching process.

ITEM	DESCRIPTION	PRICE
BZ-LASER	Laser device (10 mW), 50 watts, 50/60 Hz.	2 475.00 \$

Lighting device (solar powered)

Useful for chasing animals away after dawn, this lighting device flashes numerous light sequences if a trespasser enters the defined area programmed by the device. It can reload itself with the sunlight and activate when the sun has completely disappeared. Also operates with an On/Off switch. Thanks to its small size, you can install this device pretty much anywhere you want.

ITEM	DESCRIPTION	PRICE
YL-010	Solar powered lighting device.	90.18 \$

Anti-bird spikes for edges

These protector spikes will make things difficult for birds who would normally settle in places you do not wish to see them, like on the edge of a fence for example, without hurting them in any way. Each spike is 12 centimeter long and resist against ultraviolet rays for a 10-year period. Available in plastic and stainless steel.

- GT-008:** 5 strips with a length of 48.5 cm each.
PS-001: 6 strips with a length of 25 cm each.

ITEM	DESCRIPTION	PRICE
GT-008	Kit of 5 anti-bird strips made of stainless steel.	100.29 \$
PS-001	Kit of 6 anti-bird strips made of plastic.	93.09 \$

Scare launchers (sound)

These launchers will scare off many kinds of predators. Equipped with a cannon, they can shoot whistling and explosive bullets. Please consult your municipal legislation in order to be acquainted with the possible use restrictions in your area. **You must be over 18 in order to buy one of these products.**

13050 - Single shot Launcher: popular as a bear deterrent or for farmers to prevent bird crop-damage.

13040 - Double shot Launcher: double your deterrent power for more aggressive hazing of birds and bears.

RG-300 - RG-300 Ten shot Clip Launcher: for rapid deployment and aggressive hazing against animals.

RG-46 - RG-46 Seven shot Revolver Launcher: reliable, easy to use and fast firing revolver launcher.

Other launchers and bullets available on demand.
