

# Nets / Landing nets

## Plastic nets

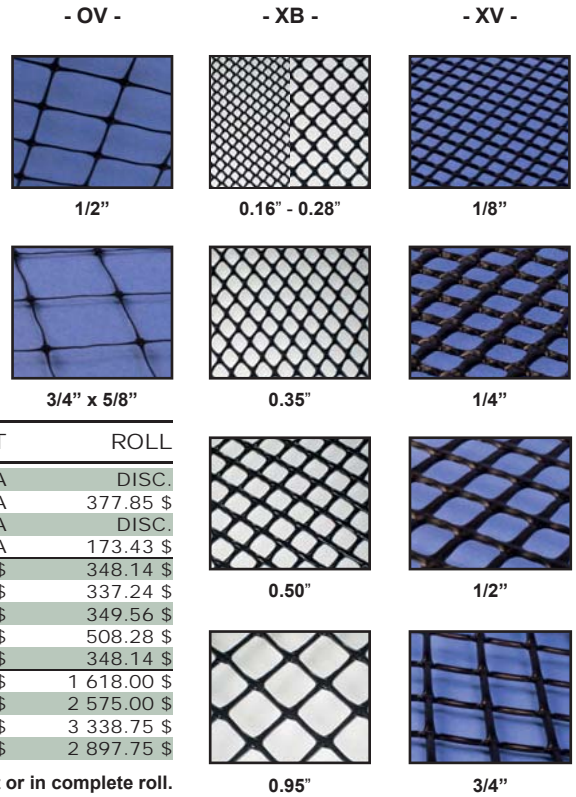

Our plastic nets are suitable for many non-toxic applications and resistant to seawater and chemical products. Moreover, the AQUAMERIK plastic nets are UV stabilized for increased durability.

A resistant, flexible, easy to clean product and available in a wide variety of meshes. The "OV" series is characterized by a very light and flexible square mesh, ideal for preventing birds intrusion. Easy to install above the water, these nets won't be damaged by the sun. Available in rolls of 100 feet.

The "XB" series features a diamond-shaped net configuration allowing for maximum resistance. AQUAMERIK keeps in stock the "XB" series for fast delivery. To complete its range of plastic nets, AQUAMERIK presents the "XV" series, a unique square-shaped construction with welded joints for higher strength.

# Nets / Landing nets

## Heavy duty landing nets

High quality and affordable landing nets. The frames and handles are made of stainless steel for uncompromising sturdiness. The handle for fish farming landing nets is made of PVC for greater lightness. The **PS1 & PS5** have a plastic protector around the frame that extends the net lifespan. Our nets are made of knotless nylon and are available in different depths. The replacement of the net is quickly and easily done thanks to the unique locking system. **PAF-14**: net with protective frame.

# Nets / Landing nets

## Low-cost landing nets

Soft landing nets for small fish. The delicacy of these nets minimizes the stress during capture and transport to another tank.

Completely covered with a non-toxic plastic, the handle provides lightness and ease of use. Clean and safe for all situations.

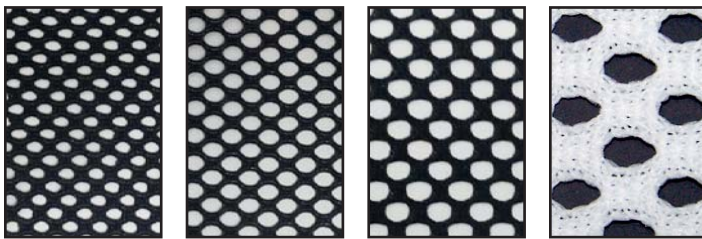

Available in different frame shapes and with different handle lengths. Quantity discounts available.

## 100% nylon nets (knotless)

Our high quality nylon nets are resistant and non-abrasive. This net won't scale the fish. Perfect for small fry and other fish that can be easily injured. This material is ideal for use with landing nets, floating pens and any other application requiring a soft and durable net with a small mesh. It won't get moldy or rot, it can be stored wet. This net is sold per linear meter or foot and is available in the following widths: 4', 6', 8' and 10'.

## Replacement nets

Perfect for replacing the net on your landing nets (available at our store) but also for other models having a frame of a similar size. Different mesh sizes are available depending on your needs. Either for fry or genitors, Aquamerik has the model you need. They are durable, easy to replace and resist putrefaction.

In order to find the suitable net model for your landing net, you have to measure its frame size, then compare it with the "FRAME DIMENSIONS" column in order to determine the net depth and mesh size.

To place an order or get information about other net sizes, an Aquamerik representative will be happy to help you.

**Note that the hole size found in the "MESH (type)" column refers to the net model shown in one of the squares below.**

# Nets / Landing nets

## Beach seines

The seine is a surrounding net. Its use consists to encircle the fish in order to capture them. It is made of three sections, including two wings located at the ends and a pocket in the central part. It is built from nylon. We manufacture rectangular seines, but also pear-shaped, depending on your use. It is important to know the water depth where the seine will be used.

The upper part of the seine is assembled on a polypropylene strengthening rope and is provided with surface floats. The lower part is built with a weighted double braid.

ITEM	DEPTH	LENGTH	MESH	PRICE
SER-01	6' (1.8 m)	100' (30.5 m)	1/2" & 3/4"	1 294.80 \$
SER-02	12' (3.6 m)	150' (45.6 m)	1/2" & 3/4"	3 867.50 \$
SER-03	12' (3.6 m)	150' (45.6 m)	3/4" & 1"	3 770.00 \$

## Retention cages

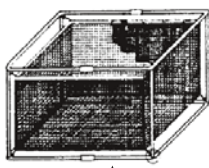

These cages are used to keep fish alive while transporting them to the labeling or any other activity. Constructed in solid aluminum, they can be taken apart. The bottom of the cage is constructed with a net more resistant than others.

The lid is removable and is attached to the sides of the cage by using some "Velcro". The drawing shows the cage and its components. Custom sizes available.

Retention cage **CR-01** has the same characteristics as item **CDR-01** but it is not removable. **CR-PVC** has a plastic net and structure, it is not removable but can be delivered in parts to reduce transportation costs.

### CDR-01 - Can be taken apart

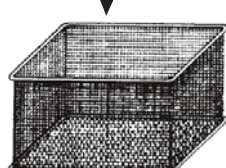

Removable lid with velcro

Removable aluminum frame

### CR-01 - Can't be taken apart

Aluminum frame

ITEM	DIMENSIONS (le. x wi. x he.)	PRICE
CDR-01	6' x 4' x 4' aluminum, removable.	570.00 \$
CR-01	6' x 4' x 4' aluminum, not removable.	525.00 \$
CR-PVC	10' x 4' x 4' in pvc, not removable.	815.00 \$

## Fish traps

Necessary instrument for fish handling and transport (different sizes and types of fish). Available in plastic (**NP-MT1**) and galvanized (**NP-MT2x**)

NP-MT1

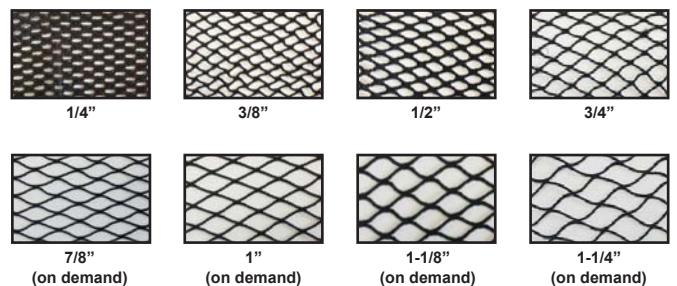

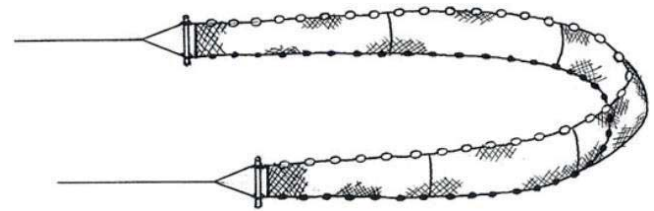

NP-MT28

ITEM	DESCRIPTION	Ø x LENG.	MESH	PRICE

NP-MT22	Crawfish trap	9" x 31"	1/4"	50.78 \$

## Seines - rectangular type

Our seines are now handmade by a specialized company which strives to offer the best quality products. All of our seines are assembled on a polyethylene braided rope of 1/4" diameter with plastic floats (7 ounces of buoyancy) and a weighted strengthening rope (27 lbs / 300 feet).

Even if they are custom-built, delivery time does not exceed 10 days. **Sold by linear foot.**

\* Sold by linear foot.
